

#### Leland Limited Inc. Product: Nitrous Oxide

1. Identification		
Product Identifiner	: Nitrous Oxi	
Other means of identification	: Nitrous Oxi	de, N2O, UN 1070
Product use	: Synthetic, A	nalytical chemistry
Supplier	: Leland Limi	ted, Inc.
		Clinton Ave.
		field, NJ 07080
	1-908-561-2	2000 (8-4 EST)
Emergency calls	4 000 070	
Hazmat Service Inc.		7542 (Domestic)
Contract #1264	: 1-484-951-2	2432 (International)
2. Hazards Identification		
OSHA/HCS status		al is considered hazardous by the OSHA Hazard
		ation Standard (29 CFR 1910. 1200).
Classification of the	: Oxidizing G	
substance or mixture		er pressure – Compressed gas
CHS lobal alamanta	Specific tar	get organ toxicity (single exposure) (narcotic effects)
<u>GHS label elements</u> Hazard pictograms		
Hazaru pictograms		$\wedge \wedge$
	athe	
	•	$\mathbf{v}$
Signal word	: Danger	
Hazards statements	•	is under pressure; may explode if heated
	•	or intensity fire; oxidizer
		e oxygen and cause rapid suffocation.
	May cause May cause	drowsiness and dizziness.
Precautionary statements	May cause	nosibile.
General	: Read and fe	bllow all Safety Data Sheets (SDS'S) before use. Read label
	before use.	Keep out of reach of children. If medical advice is needed,
	have produ	ct container or label at hand. Close valve after each use and
	when empty	/. Use equipment rated for cylinder pressure. Do not open
		onnected to equipment prepared for use. Use a back flow
	•	e device in the piping. Use only equipment of compatible
		construction. Open valve slowly. Use only with equipment
		Oxygen service.
Prevention		from clothing, incompatible materials and combustible
		eep reduction valves free from grease and oil. Use only
		in a well-ventilated area. Avoid breathing gas. Use and store
Response	•	rs or in a well ventilated place.
Response		re: Stop leak if safe to do so.
		D: Remove person to fresh air and keep comfortable for

		breathing. Call a POISON CENTER or doctor/physician if you feel unwell.
Storage	:	Store locked up. Protect from sunlight. Protect from sunlight when
		ambient temperature exceeds 40C/104F. Store in a well-ventilated place.
Disposal	:	Dispose in accordance with all applicable regulations.
Hazards not otherwise	:	In addition to any other important health or physical hazards, this product
classified		may displace oxygen and cause rapid suffocation.

# 3. Composition, Information on Ingredients

:	Substance
:	Nitrous oxide
:	Nitrous Oxide, N2O, Laughing gas,
	UN 1070
:	10024-97-2
:	99.5 % or more
	:

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### 4. First Aid Measures

Description of necessary first aid measures

Inhalation :	Remove exposed person to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular, or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or
	physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of
	decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Skin Contact :	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Eye Contact :	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.
Ingestion :	Since this product is a gas, refer to the inhalation section.
Most important symptoms/effect	s, acute and delayed

 Potential acute health effects

 Inhalation
 : Can cause central nervous system (CNS) depression. May cause drowsiness and dizziness. Exposure to decomposition products may

Specific treatments	: No specific treatment.	
Protection of first-aiders	: No action shall be taken involving any pers training. If it is suspected that fumes are stil wear an appropriate mask or self-contained be dangerous to the person providing aid to resuscitation.	ll present, the rescuer should d breathing apparatus. It may
<b>5. Fire Fighting Measure</b> Extinguishing media	S	
Suitable extinguishing media	: Use an extinguishing agent suitable for the	surrounding fire.
Unsuitable extinguishing media	: None known.	
Specific hazards arising from the chemical	: Contains gas under pressure. Oxidizing ma the risk of fire and may aid combustion. Co may cause fire. In a fire or if heated, a press container may burst or explode.	ntact with combustible material
Hazardous thermal	: Decomposition products may include the for	bllowing materials:
decomposition products	Nitrogen Oxides	<b>, , , , , , , ,</b> , ,
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all incident if there is a fire. No action shall be risk or without suitable training. Contact sup advice. Move containers from fire area if the Use water spray to keep fire-exposed conta off flow immediately if it can be done without	taken involving any personal oplier immediately for specialist is can be done without risk. ainers cool. If involved fire, shut

REVISED DEC 27, 2021

Special protective equipment for fire-fighters

Fire-fighters should wear appropriate equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

# 6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

• •		••••
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing gas. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	:	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	:	Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill	: Immediately contact emergency personnel. Stop leak if without risk. Use
	spark-proof tools and explosion-proof equipment.
Large spill	: Immediately contact emergency personnel. Stop leak if without risk. Use
	spark-proof tools and explosion-proof equipment. Note: see Section 1 for
	emergency contact information and Section 13 for waste disposal.

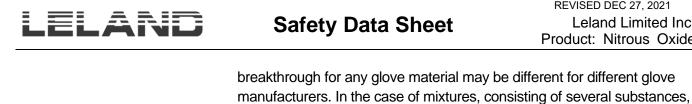

### 7. Handling and Storage

Precautions for safe handling

Frecautions for sale nationing		
Protective measures	Put on appropriate personal protective equipment (see Section 8). Contains gas under pressure. Avoid contact with eyes, skin and cloth Avoid breathing gas. Use only with adequate ventilation. Wear appro respirator when ventilation is inadequate. Keep away from clothing, incompatible materials and combustible materials. Keep reduction va- free from grease and oil. Empty containers retain product residue an be hazardous. Do not puncture or incinerate container. Use equipmer rated for cylinder pressure. Close valve after each use and when em- Protect cylinders from physical damage; do not drag, roll, slide, or dr Use a suitable hand truck for cylinder movement.	priate alves d can ent pty.
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where the material is handled, stored and processed. Workers should wash ha and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See Section 8 for additional information on hygiene measures.	nds d
Conditions for safe storage, including any	Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and	b

incompatibilities	well-ventilated area, away from incompatible materials (see Section 10). Store locked up. Separate from acids, alkaline, reducing agents and combustibles. Keep container tightly closed and sealed until ready for use. Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 40C (104F).			
8. Exposure Controls and P Control parameters	Personal Protection			
Occupational exposure limits				
Ingredient name	Exposure limits			
Nitrous Oxide	ACGIH TLV (United States, 6/20/13)			
	TWA: 90 mg/m <sup>3</sup> , 8 hours			
	TWA: 50 ppm, 8 hours NIOSH REL (United States, 4/20/13)			
	TWA: 46 mg/m <sup>3</sup> , 10 hours			
	TWA: 25 ppm, 10 hours			
Appropriate engineering :	Use only with adequate ventilation. Use process enclosures, local exhaust			
controls	ventilation or other engineering controls to keep worker exposure to			
	airborne contaminants below any recommended or statutory limits.			
Environmental exposure : control	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.			
Individual protection measures				
Hygiene measures :	Wash hands, forearms and face thoroughly after handling chemical			
	products, before eating, smoking, using the lavatory and at the end of your shift. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.			
Eye/Face protection :	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.			
Skin protection				
Hand protection :	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to			

Body protection	<ul> <li>the protection time of the gloves cannot be accurately estimated.</li> <li>Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.</li> </ul>
Other skin protection	: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

### 9. Physical and Chemical Properties

Appearance		•			
Physical state	:	Gas [Compress	sed gas]		
Color	:	Colorless			
Molecular weight	:	44.01 g/mol			
Molecular formula	:	N2-O			
Boiling/condensation point		-88.5C (-127.3F	-)		
Melting/freezing point	:	-90.8C (-131.4F	-)		
Critical temperature	:	36.55C (97.8F)			
Odor	:	Characteristic			
Odor threshold	:	Not available.			
рН	:	Not available.			
Flash point	:	[Product does r	not sustain combustion.]		
Burning time	:	Not applicable.			
Burning rate	:	Not applicable.			
Evaporation rate	:	Not available.			
Flammability (solid, gas)	:	Extremely flammable in the presence of the following materials or			
		materials.	ucing materials, combustible materials and organic		
Lower and upper explosive	:	Not available.			
(flammable) limits					
Vapor pressure	:	745 psig			
Vapor density	:	1.53 (Air = 1)	Liquid Density@BP: 76.8 lb/ft3 (1230 kg/m3)		
Specific Volume	:	8.6957 ft <sup>3</sup> /lb			
Gas Density	:	0.115 lb/ft <sup>3</sup>			
Relative density	:	Not applicable.			
Solubility	:	Not available.			
Solubility in Water	:	1.2 g/l			
Partition coefficient:	:	0.36			
n-octanol/water					

Auto-ignition temperature	:	Not available.
Decomposition temperature	:	Not available.
SADT	:	Not available.
Viscosity	:	Not applicable.

# 10. Stability and Reactivity

To olubility and reduction	·y	
Reactivity	:	No specific test data related to reactivity is available for this product or its ingredients.
Chemical stability	:	The product is stable.
Possibility of hazardous reactions	:	Hazardous reactions or instability may occur under certain conditions of storage or use. Conditions may include the following: contact with combustible materials
		Reactions may include the following: risk of causing fire
Conditions to avoid	:	No specific data.
Incompatibility with various substances		Extremely reactive or incompatible with the following materials: oxidizing materials, reducing materials and combustible materials.
Hazardous decomposition products	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Hazardous polymerization	:	Under normal conditions of storage and use, hazardous polymerization will not occur.

Nitrous Oxide

# **13. Disposal Considerations**

Discharge of Nitrous Oxide		Gradually release in open air.
Disposal of Cylinders	:	If gas remains in cylinders, release gas with proper equipment and dispose of cylinders as incombustible waste. For empty cylinders, check for a puncture hole and dispose of as incombustible waste. Do not dispose of cylinders without first checking that all gas has been released.

#### 14. Transport Information

DOT / IMDG	:	Nitrous Oxide
Shipping Name		
UN Number	:	UN 1070
Hazard Class (Division)	:	2 (2.2)
Subsidiary Hazard Class	:	5.1
Placard (When required)	:	Nonflammable gas, Oxidizer

Special Shipping Information IMDG / IMO Proper Shipping Name	:	See CFR 49, 172.101, 173.306 for exceptions of labeling. 8g N20 cartridiges can be ground shipped as "Limited Quantity". Receptacles, small containing gas (Gas Cartridge < 50ml)
UN Number	:	UN 2037
Hazard Class (Division)	:	2 (2.2)
Special Provision	:	See Code 191
ΙΑΤΑ	:	Gas Cartridges (Oxidizing)
Proper Shipping Name
